New.

1. The new mufledrain channels can also be joined together with the gratings/covers already installed on in order to reduce installation times.
2. The new mufledrain channels have new fixing-to-channels systems, as the inner side HD-PE pins and the unreleased quick fasten clips , for an easy and safe gratings installation.
3. The inner surface guarantees an high roughness index and do not have any external passing hole in order to avoid and water infiltration.

Watertight: To ensure the watertight of the channels, it is advisable to use an adhesive bituminous sealing. As a complete and long lasting guarantee of absence of leakages through the joints of the channels, it is possible to hot-solder the joints
